Subject: Letter of Recommendation

Dear Sirs

The company Mecwind Alternative Energys and its wind energy team, collaborated under my supervision in the replacement of wind turbine blades in various wind farm projects in 2011. Also in the change of a main shaft transmission, a pioneer operation in our European structure. While cooperating with us, they proved to be a competent company, with a professional and talented team.

Their detailed and clear operations, timeously identifying the various problems, coupled with a proactive forward attitude and immediate solutions, generated an excellent interaction with our responsible team.

I was impressed with the ability of Mecwind Alternative Energys in finalizing tasks timeously, their profound knowledge, never ending willingness to learn, study and investigate, their technical accuracy and excellent quality of work.

This company will certainly be an absolute asset in any project or operation with wind turbines, therefore I strongly recommend Mecwind Alternative Energys in any installation function in the world of wind energy.

Yours faithfully

Jorge Rocha  
Installation Manager
